

**MUST READ: POSSIBLE FLU EPIDEMIC?**

**Protect yourself and your family.....and tell the world about this!**

There was a Flu Epidemic in 1917-18 that we now know killed around 20 million people around the world and 500,000 here in the U.S. “But out of this particular epidemic, the young Science of Chiropractic grew into a new measure of safety and effectiveness...and went on to be legally licensed in all 50 states.” Why?

**Chiropractors got fantastic results from Flu patients while those under medical care died like flies all around!** “Statistics reflect a most amazing, almost miraculous state of affairs. The medical profession was practically helpless with the flu victims, but Chiropractors had stunning results.”

In Davenport, Iowa, 50 medical doctors treated 4,953 cases, with 274 deaths. In the same city, 150 chiropractors (including students and faculty at the Palmer School of Chiropractic) treated 1,635 cases with only **one** death.

In the state of Iowa, medical doctors treated 93,590 patients, with 6,116 deaths—a **loss of one patient out of every 15**. In the same state, excluding Davenport, 4,735 patients were treated by chiropractors with a loss of only 6 cases...**a loss of one patient out of every 789**.

**WHAT IS THE BEST WAY TO PREVENT THE SWINE FLU?**

**Every adjustment increases white blood cell count and balances hormones—side effects include more health and less pain!**

“Nationally figures show that 1,142 chiropractors treated 43,394 patients for influenza during 1918, with a loss of 54 patients—**one out of every 886**. Reports show that in New York City, during the Flu epidemic of 1918, out of 10,000 cases medically treated, 950 died; and in every 10,000 pneumonia cases medically treated, 6,400 died. In the same epidemic, under drugless methods, only 25 patients died of influenza out of every 10,000 cases; and only 100 patients died of pneumonia out of every 10,000 cases.” **READ THIS TABLE....WOW!!!!**

<b>INFLUENZA (New York City, 1918)</b>	<b>Cases</b>	<b>Deaths</b>
Under medical methods	10,000	950
Under drugless methods	10,000	25
<b>PNEUMONIA (New York City, 1918)</b>	<b>Cases</b>	<b>Deaths</b>
Under medical methods	10,000	6,400
Under drugless methods	10,000	100

“In the same epidemic, reports show that Chiropractors in Oklahoma treated 3,490 cases of influenza with only 7 deaths. But the best part of this is, in Oklahoma there is a clear record showing that Chiropractors were call in 233 cases where medical doctors had care for the patients, and finally gave them up as lost. The Chiropractors saved all these lost cases but 25.”
